

Universidad Nacional Autónoma de México.

FES Aragón.

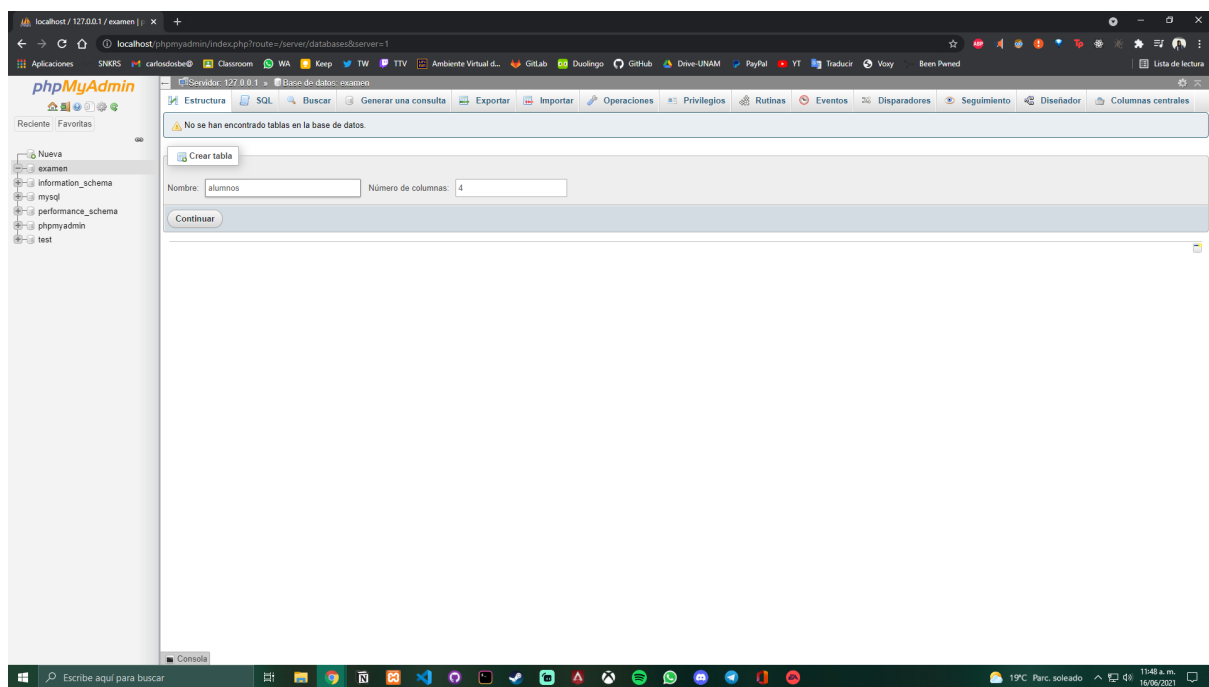

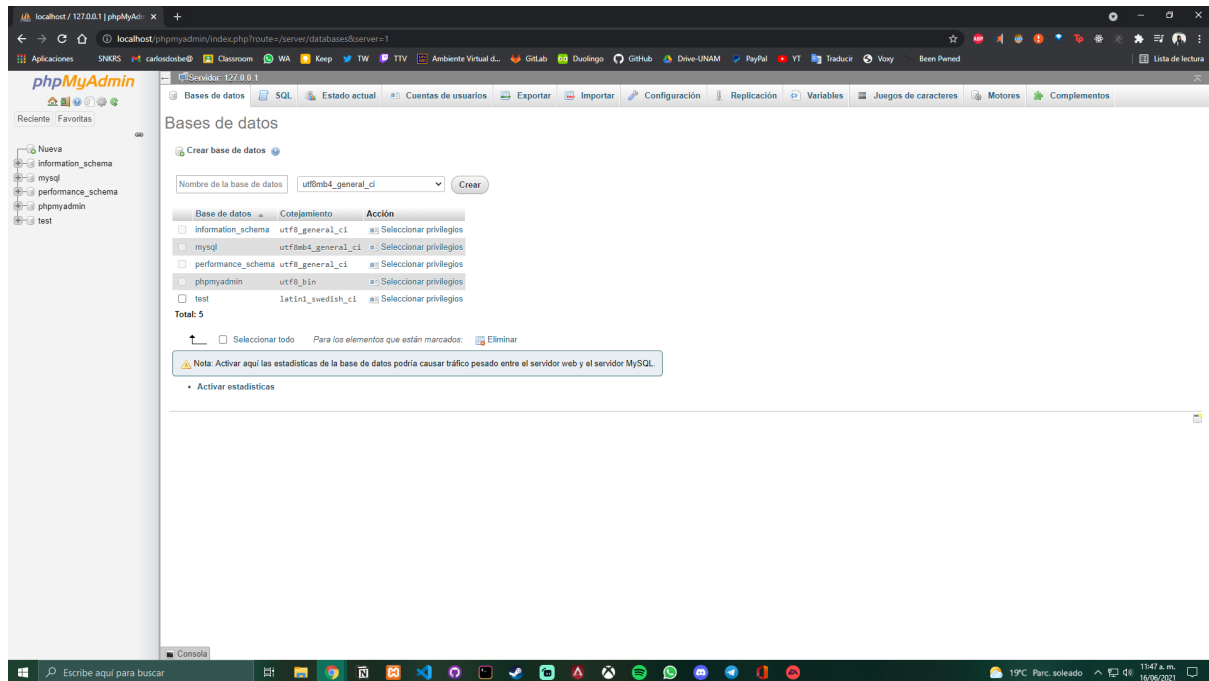

Osorio Benavides Carlos Daniel.

Actividad Extra Examen.

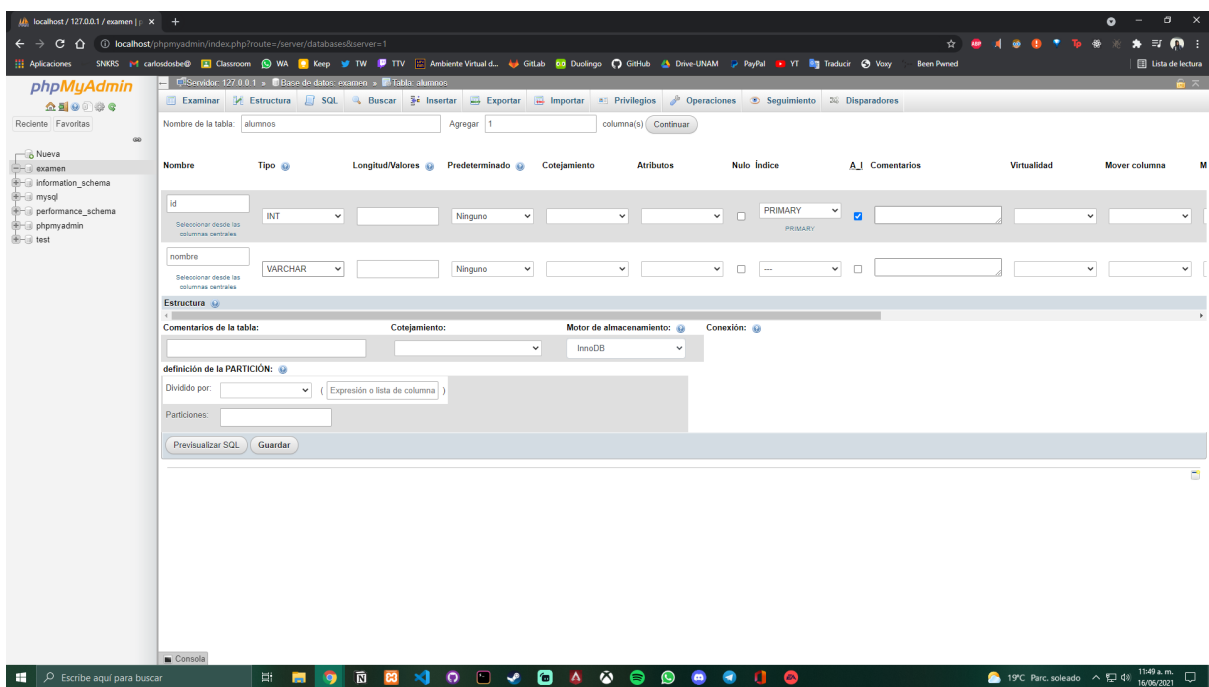

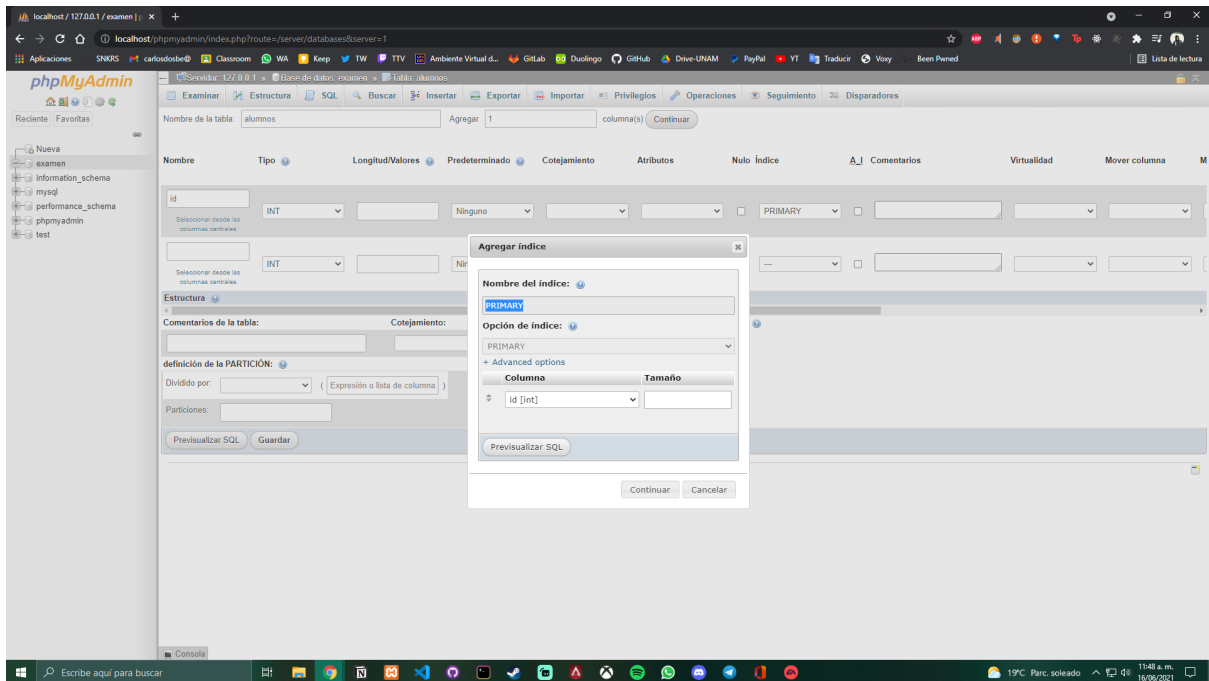

**Organización y administración de centros
de cómputo.**

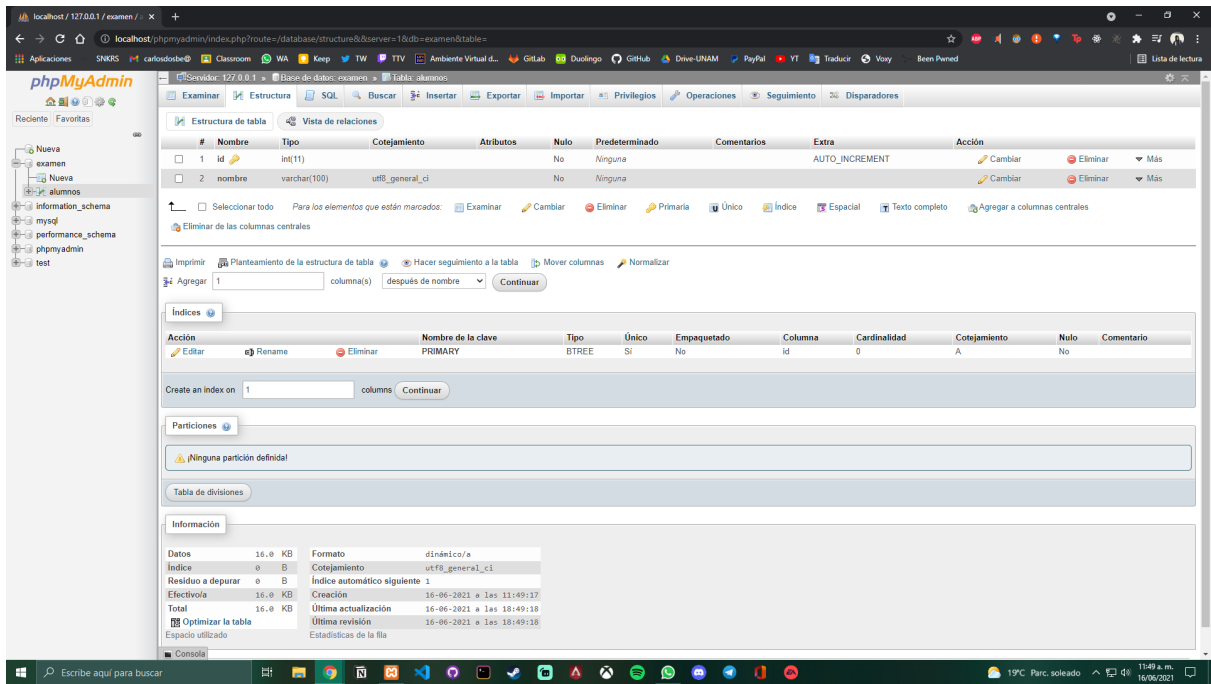

Grupo: 2809.

Con el programa xampp desde phpmyadmin cree la base de datos “examen”.

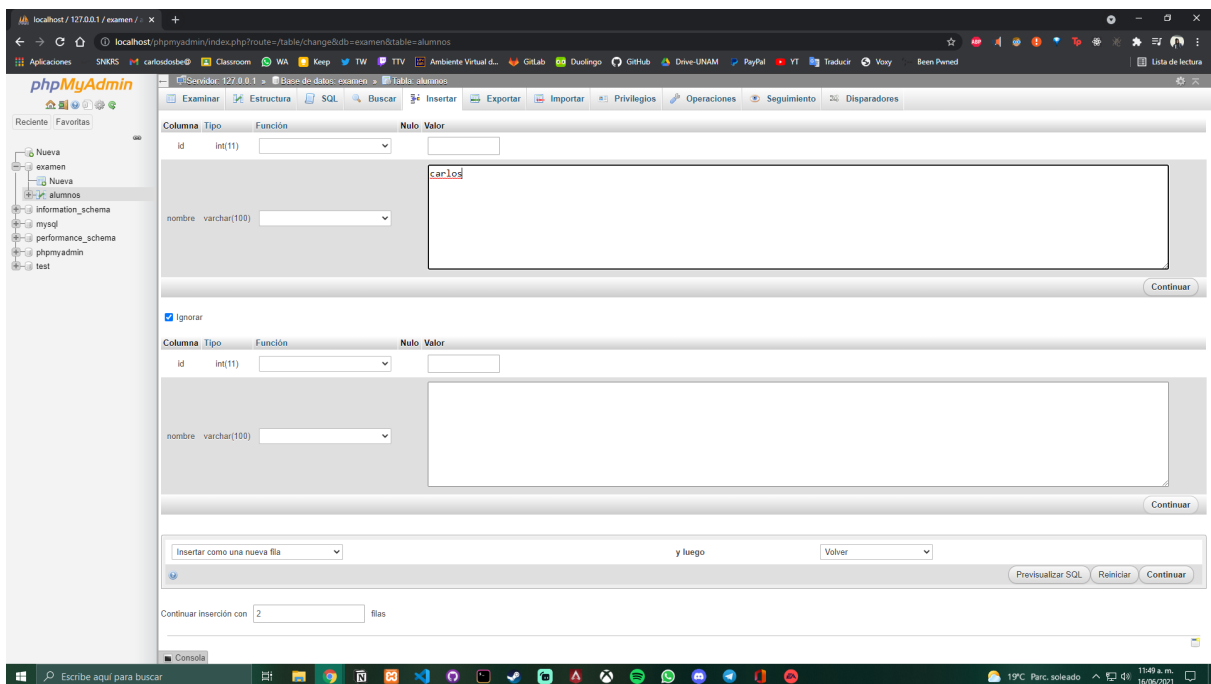

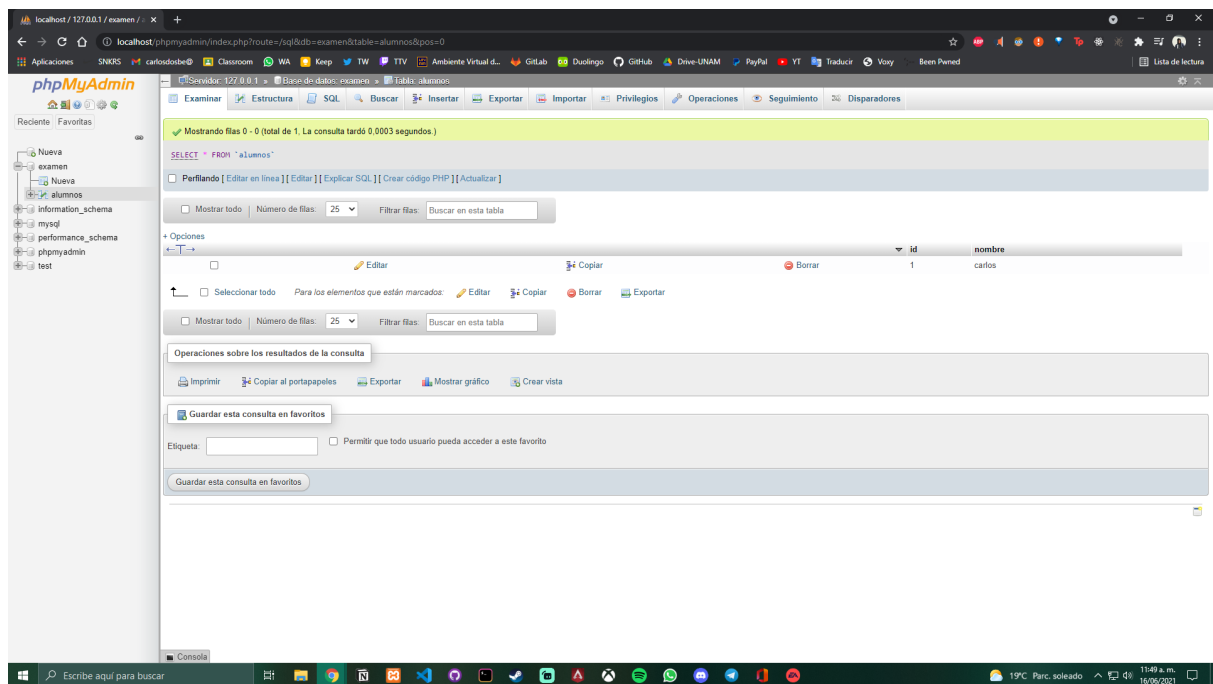

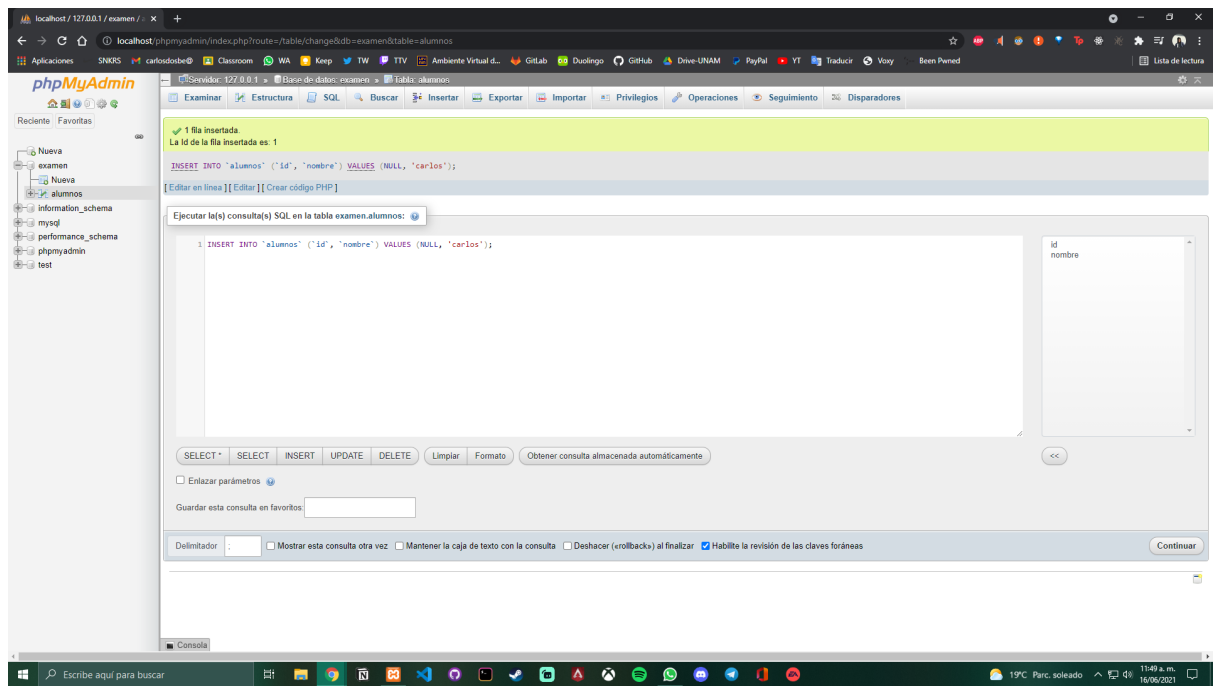

Cree la tabla “alumnos”, con dos datos, mi nombre Carlos y un id 1.

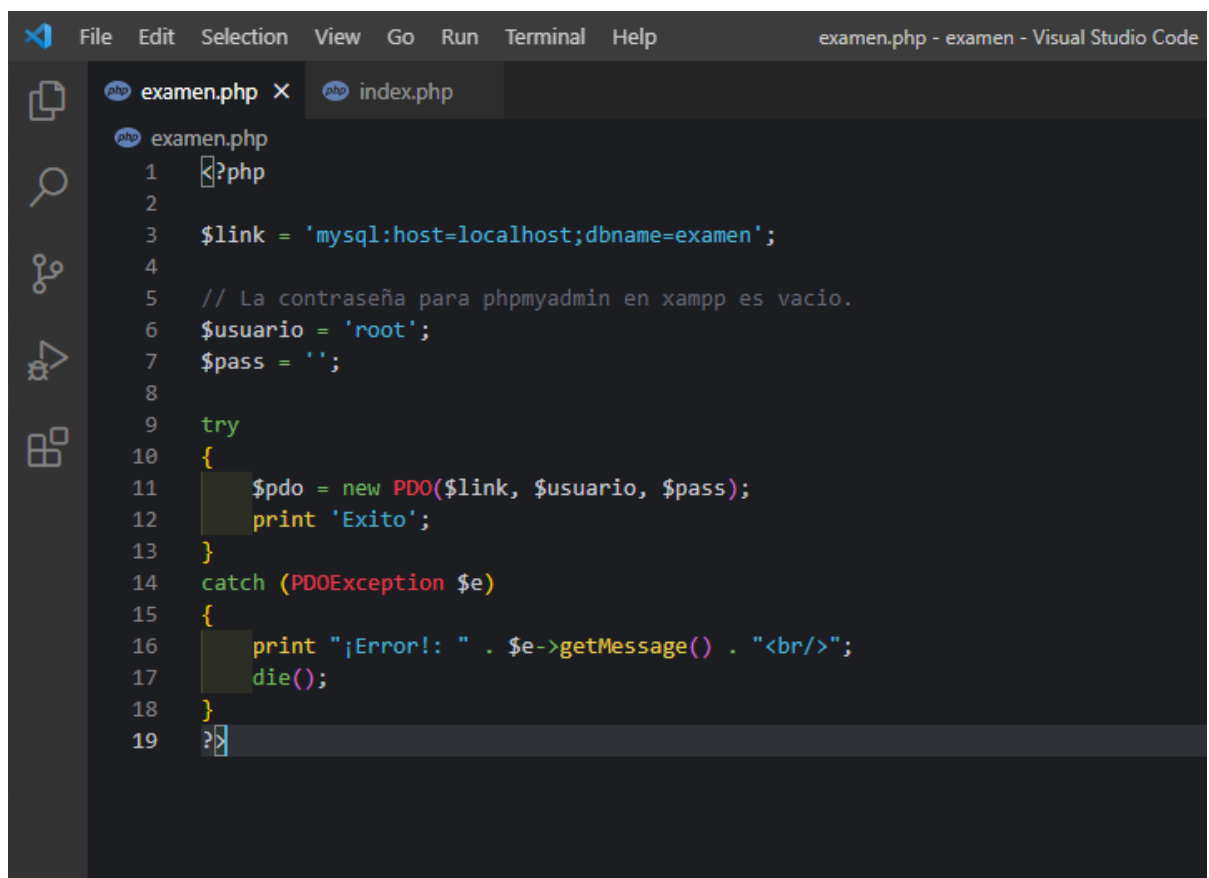

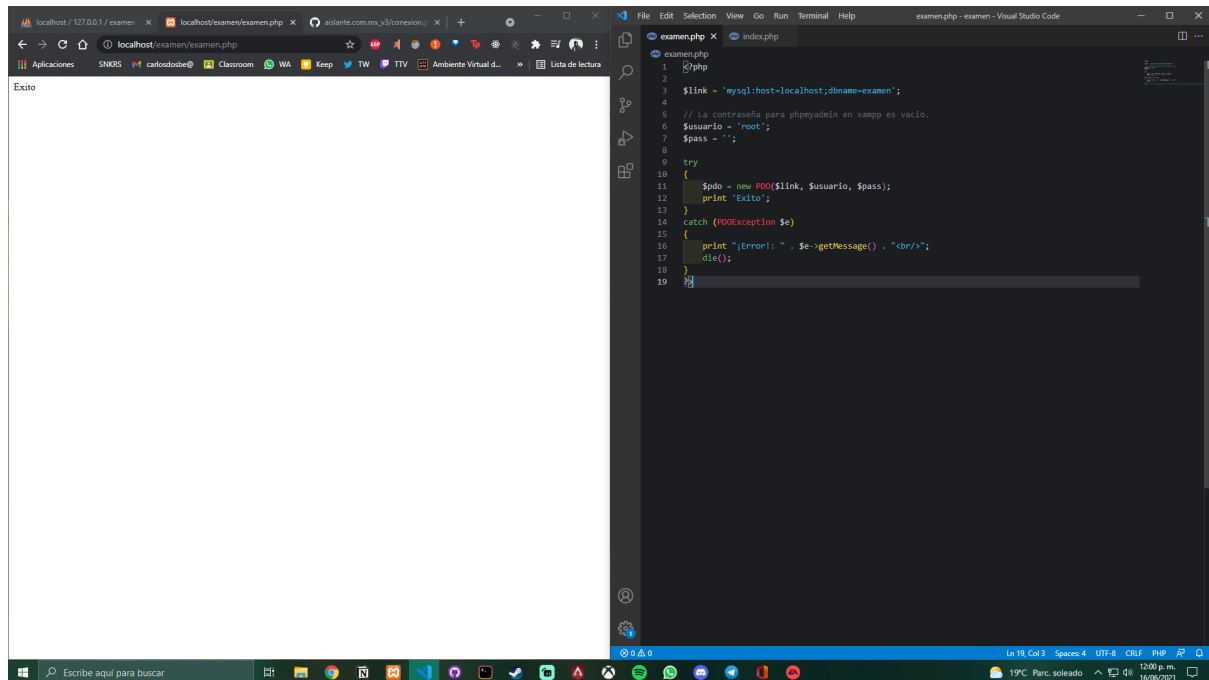

Insertando datos de la tabla.

Creando archivo de conexión en la base de datos en php y comprobando conexión.

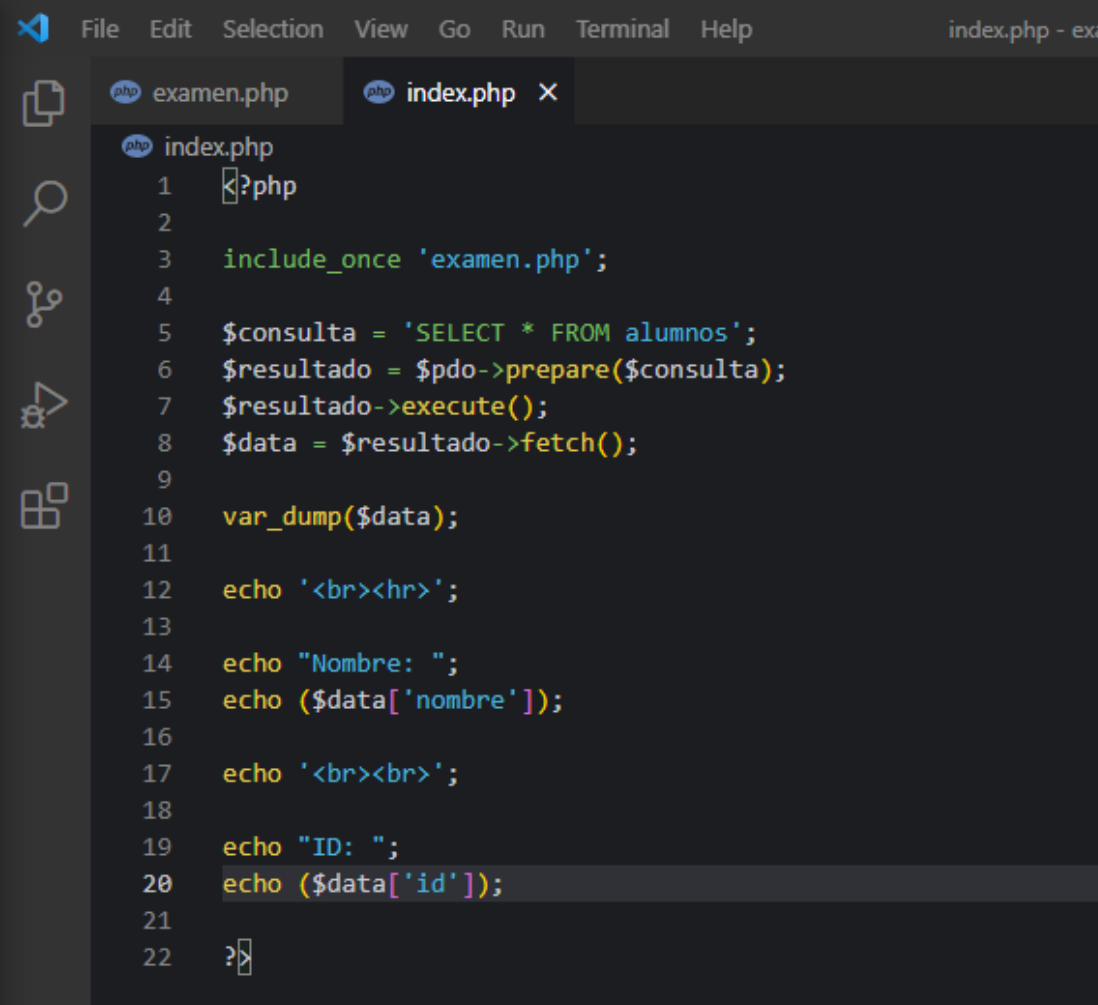

Consulta a la base de datos.

The screenshot shows a web browser on the left and a Visual Studio Code editor on the right. The browser displays the output of a PHP script: `Exitoarray(1) { [0]=> array(4) { ["id"]=> string(1) "1" [0]=> string(1) "1" ["nombre"]=> string(6) "carlos" [1]=> string(6) "carlos" }`. The VS Code editor shows the `index.php` file with the following code:

```
1 <?php
2
3 include_once 'examen.php';
4
5 $sql_pag = "SELECT * FROM alumnos";
6 $sentencia_pag = $pdo->prepare($sql_pag);
7 $sentencia_pag->execute();
8 $resultado_pag = $sentencia_pag->fetchAll();
9
10 var_dump($resultado_pag);
11
12
```

The screenshot shows a web browser on the left and a Visual Studio Code editor on the right. The browser displays the output of a PHP script: `Exito array(4) { ["id"]=> string(1) "1" [0]=> string(1) "1" ["nombre"]=> string(6) "carlos" [1]=> string(6) "carlos" }`, followed by `Nombre: carlos` and `ID: 1`. The VS Code editor shows the `index.php` file with the following code:

```
1 <?php
2
3 include_once 'examen.php';
4
5 $consulta = "SELECT * FROM alumnos";
6 $resultado = $pdo->prepare($consulta);
7 $resultado->execute();
8 $data = $resultado->fetch();
9
10 var_dump($data);
11
12 echo "<br>";
13
14 echo "Nombre: ";
15 echo ($data['nombre']);
16
17 echo "<br>";
18
19 echo "ID: ";
20 echo ($data['id']);
21
22
```

```
1 <?php
2
3 include_once 'examen.php';
4
5 $consulta = 'SELECT * FROM alumnos';
6 $resultado = $pdo->prepare($consulta);
7 $resultado->execute();
8 $data = $resultado->fetch();
9
10 var_dump($data);
11
12 echo '<br><hr>';
13
14 echo "Nombre: ";
15 echo ($data['nombre']);
16
17 echo '<br><br>';
18
19 echo "ID: ";
20 echo ($data['id']);
21
22 ?>
```
